# FOREWORD

---

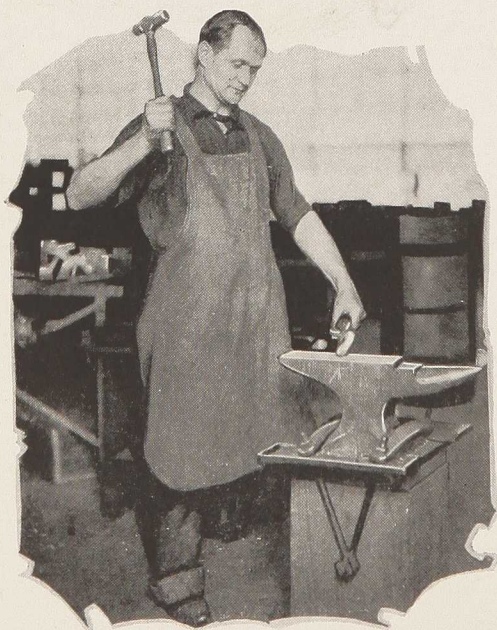

**W**HEN man first made his dwelling place a permanent home, hardware had its origin. In that dim day when violence stalked on every hand, man's life often depended on his crude door and its fastenings.

With the medieval feudal castles came a great development in the use and utility of hardware.

Smiths who made the swords and armor for protection of men, also made hinges and hasps, drawbolts and rough locks on which the defense of the castle relied.

In the middle ages, the smiths and metal workers formed trade guilds, and artistic craftsmanship and still higher standards of quality were brought to hardware making. They gave design and ornamentation to the crude hardware of the earlier smiths and armorers. Hardware was made to grace buildings as well as serve a purpose of utility. Craftsmen vied with each other in producing work in which beauty and artistry predominated.

Hardware from the forges of these guildsmen is to be seen in many of the showplaces of Europe today, striking in its beauty, and still unimpaired by time or use. This heritage of skill in workmanship and design left us by the early smiths is reflected in the best hardware of the present day.

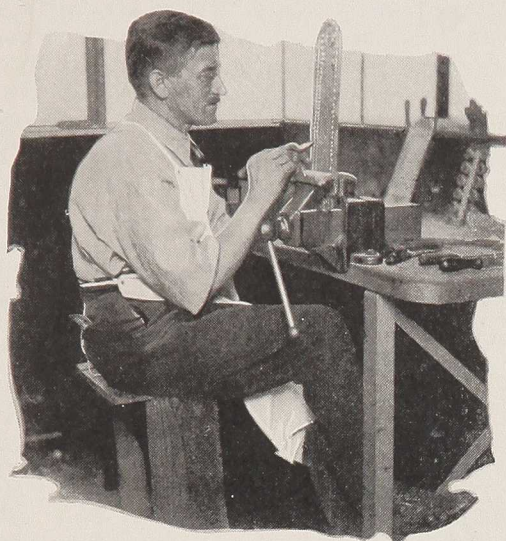

## *Where Old Ideals Still Prevail*

The ideals of the medieval guildsmen are cherished today by the makers of Earle Hardware. Earle products are executed by artisans who, unhurried in their work, do each thing the best way it possibly can be done. No one is employed on a piece-work basis in the Earle shops; nothing is done to conflict with the natural incentive of a craftsman to put into his work the enduring elements of strength and grace.

***An Art always  
true to its Period***

Most modern homes and buildings receive their style inspiration from the architecture of earlier periods, and hardware is a conspicuous element in interpreting a building's architectural style. If the expression is to be faithful, the quality, craftsmanship and design of the hardware must blend with or even accent all the other period features.

Hardware by Earle that is based on the design of an earlier period is always a faithful reproduction of that design, modified only when necessary for adaptation to modern use. Whether the structure is English, Italian, Spanish, Colonial or any other period, Earle hardware will authoritatively aid in expressing the motif. Its intrinsic beauty and craftsmanship lend to the structure a grace and dignity that is always a source of pride and satisfaction.

***The Satisfaction  
that comes with the  
Consciousness  
of Quality***

Fine hardware is an absolute necessity to homes of distinction. In building, the cost of finished hardware is but seldom more than five per cent of the total cost. Little difference is made in the final amount whether superior or quite common-

place hardware has been used. But a vast difference is made in the effect achieved.

Feminine good taste in the choosing of the elements of the home, naturally inclines women to articles of true merit and beauty. To a woman, the grace and charm of Earle Hardware always appeals. For her it has the individual touch which makes further search unnecessary.

In hardware in which quality and beauty predominate there is greater profit for everyone: the hardware merchant, the builder and the owner. With the sale, purchase or use of anything of inherent quality, comes a sense of satisfaction that is never derived from things that are common.

***Execution of  
Special designs***

The Earle Hardware Manufacturing Company not only produces its own distinctive designs of hardware, but also gives cordial cooperation to patrons in the development of original designs. From ideas and suggestions furnished us, we submit sketches and specific estimates of the hardware desired. Special orders are executed by craftsmen who are adept both in originating new conceptions and in interpreting the ideas of others.

**DEDICATION**

*The Earle Hardware Manufacturing Company dedicates this catalog to the architect who specifies fine hardware, to the merchant who sells fine hardware, to the builder who buys fine hardware, and to the owner who uses fine hardware, with the hope that the catalog may be of service to them in their ambition to make worthy in every way the buildings they create.*

---

## Complete INFORMATION for Ordering

---

**F**INISH hardware has been arranged in the catalog in the sequence in which it would be seen during the inspection of a building or home, beginning with Front Door fittings and progressing through the various hardware details for the interior. The arrangement groups together all articles of like description, Door Handles being placed in one grouping, Levers in another, and so on, each grouping taking the space necessary to give an adequate display of the complete line.

**System of Numbering** Each design is given a number, 348 or 754 or 862 as the case may be, and this number is used on all articles made in that design. The following list of suffixes are used to designate the article and the metal of which it is made:

	Suffix for Brass or Bronze	Suffix for Wrought Iron		Suffix for Brass or Bronze	Suffix for Wrought Iron
Front Door Handles.....	-1	-11	Hinge Straps.....	-6	-66
Push Buttons.....	-2	-22	Key Escutcheons.....	-7	-77
Knockers.....	-3	-33	Door Knobs.....	-8	-88
Thumb Latches.....	-4	-44	Casement Fasteners.....	-9	-99
Lever Handles.....	-5	-55	Tee Turns.....	-0	-00

While but one suffix is used for brass or bronze, when either of these finishes are ordered, they are supplied in solid brass or bronze.

Example of use: 777-1 would mean a brass or bronze door handle made in design 777. 544-11 would mean a wrought iron door handle made in design 544. 544-55 would mean a wrought iron lever handle made in design 544. By means of this manner of numbering when a design has been chosen the various items of hardware wanted in that design can be designated by simply adding the suffix for the article wanted to the design number. -10 is the suffix used for the Earle Patent Push Button Door Handle. This handle is not ordinarily made in wrought iron and for that reason has but the one suffix.

**ORDERS** In ordering the number, size and finish of the article as shown in this catalog, together with any information necessary as contained in footnotes on various pages, should be given. This will avoid errors and delay in filling orders.

All orders will receive our prompt and careful attention and will be billed at the lowest price ruling on the day order is received. This rule should work to mutual advantage.

All orders are accepted contingent upon strikes or other causes of delay that are beyond our control.

**ERRORS and CLAIMS** Claims for corrections and deductions must be made within five days after receipt of goods. Errors of any kind should be promptly reported that they may receive our immediate attention.

Telephone orders are accepted subject to customer's liability for corrections and errors.

**QUOTATIONS** Because of constantly fluctuating prices in the market for materials, all prices quoted are subject to change ten days after dating, unless a price has previously been quoted in writing with a time limit set. All prices are F. O. B. Los Angeles.

**TERMS** Terms are 2% first of month; after the fifteenth, net. After ninety days, on past due accounts, interest will be charged at the rate of 8% per annum. New customers should send references with first order, unless they are satisfactorily rated by commercial agencies.

---

**SHIPMENTS** Instructions as to route, packing and etc., should accompany all orders. Otherwise we will use our best judgment in making shipments. All parcel post shipments will be insured against loss. Freight or express shipments insured at buyers request and expense.

**If in Doubt Write or Wire** When in doubt or any complication exists, air mail affords a rapid means of communication with the full opportunity of the written letter to give explicit details and information. If the matter is of greater urgency, wire to us. In either case you will have our immediate action.

**GENERAL INFORMATION** **SCREWS**—The proper screws are supplied with all articles that require them.

**SPECIAL SCREWS**—When special sized screws are ordered, an additional charge of 5% on the cost of the articles is made.

**PACKING**—All stock hardware is appropriately wrapped or boxed, labeled and packed whenever feasible, in units of ten.

**PATENTS and TRADE-MARKS** Mechanical features of many Earle products are protected by letters patent. Many of the external designs and ornamentations are covered by design patents. Earle trade-marks are registered. All persons are cautioned against infringement of our patents, and against using Earle trade-marks or symbols, except for the purpose of indicating that the article with which they are used, was manufactured by us.

Legal process will be resorted to by us in all cases where necessary to protect these rights.

**DISPLAY BOARDS** To enable dealers to make an appropriate display of hardware, the Earle Manufacturing Company can furnish Display Boards in the sizes and prices listed below. The cost of these boards is greatly in excess of the nominal charge made for them and dealers will find them to be excellent counter and window displays.

These boards can be had in any of the following finishes: White, Ivory, Spanish Grained, Natural Redwood, Scorched Pine, Mahogany and Oak.

Board No. 1 makes an attractive display for Knobs, Levers and Latches, and etc.

Board No. 2 is appropriate for Knockers, Drawer Knobs, and similar hardware.

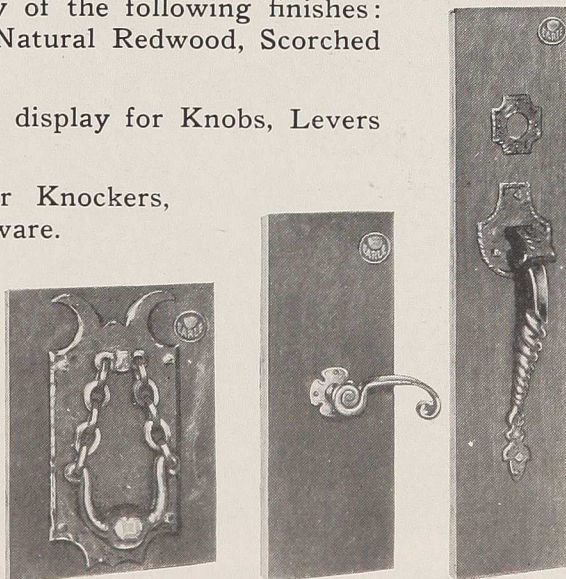

Board No. 3 makes a distinctive showing for Front Door Handles, Straps and other large pieces.

No. 1. 5"x16".....\$ .50 each, Net

No. 2. 9"x12"..... .50 each, Net

No. 3. 5"x26"..... .75 each, Net

The above prices include mounting if desired.

---

### *Assistance in the Preparation of Specifications, Bids and Estimates*

Owners, architects and contractors are free to call upon the Earle Hardware Manufacturing Company for any assistance with specifications, bids or estimates, or for any advice or suggestions that we can give pertaining to hardware.

### *Exclusive Special Designs*

When hardware is made in designs that are to be exclusive to the purchaser, a charge is made for the patterns and templates used in producing it. These patterns are either broken up or returned to the purchaser, giving assurance that the designs will be available to no one else.

### *Preliminary Sketches*

Complete data as to dimensions and mechanical requirements should accompany all requests for preliminary sketches of hardware of original design. No charge is made for rough preliminary sketches.

### *Speculative Patterns*

For complete patterns or designs, made up on the order and specifications of patrons and subject to their approval, a nominal charge is made for the labor and material involved in designing, modeling and drafting. This charge is cancelled when an order is placed for the material designed.

### *Variations in Stock Patterns*

Variations in stock patterns needed to fill the requirements of our patrons may be had at the nominal cost of making the necessary changes.

---

## Shipping and Assembling Room

To places far and near, at home and abroad, goes hardware that has become known for its merit. Every item is carefully inspected and then packed to withstand possible rough treatment in transportation.

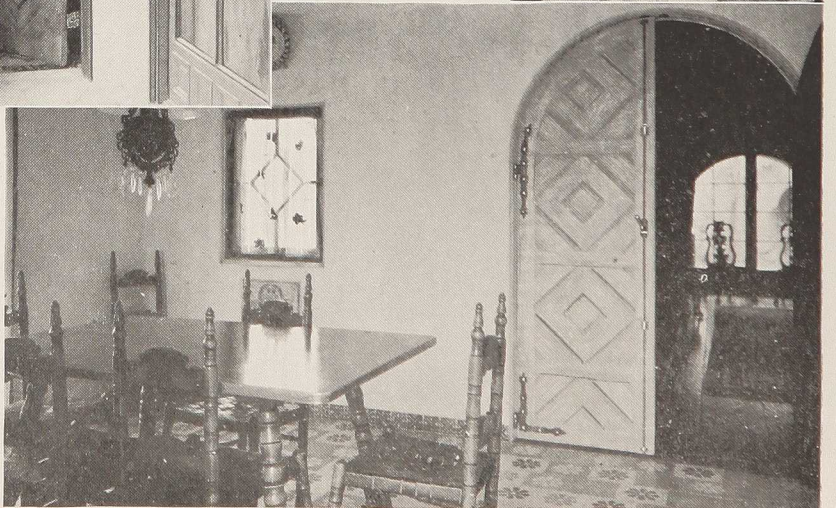

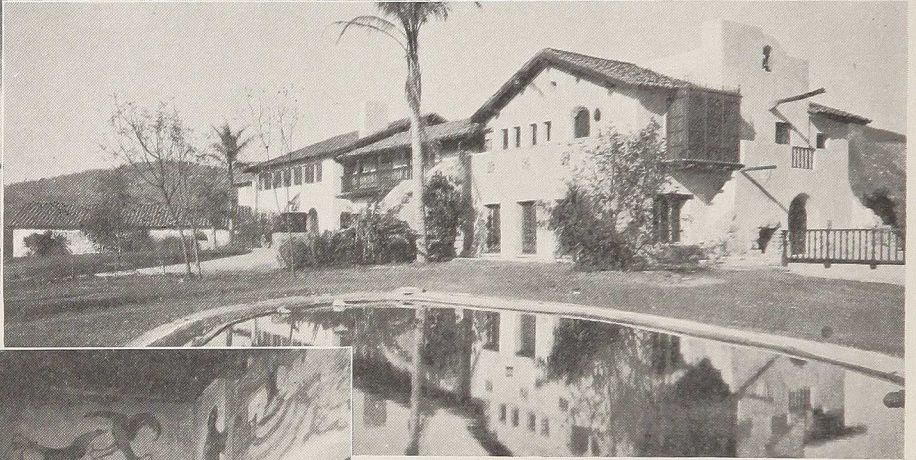

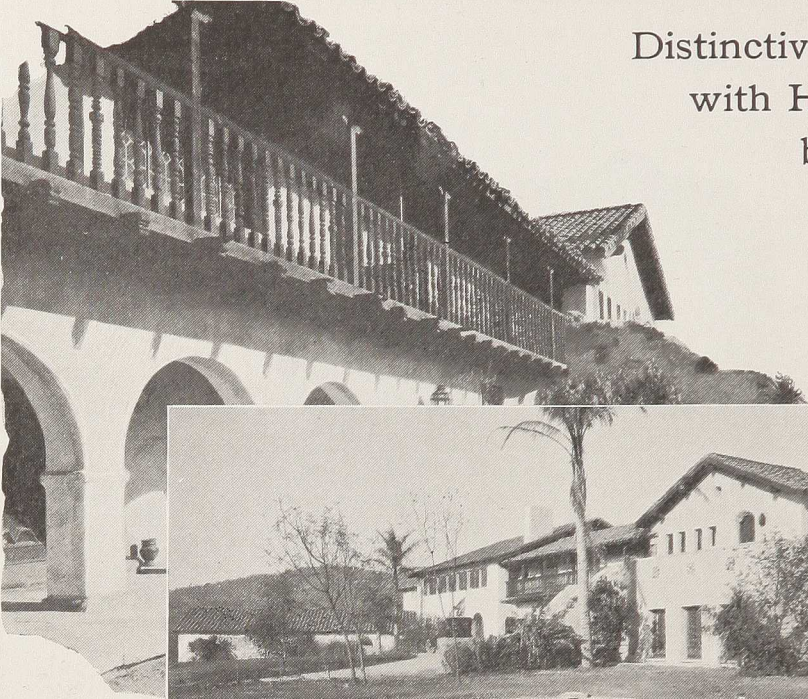

ALL works of quality must bear a price in proportion to the *time*, *skill*, *expense* and *risk* attending their manufacture. Those things called *dear*, are, when justly estimated, the cheapest: they are attended with less profit to the artist than those things which everybody calls *cheap*. Beautiful forms and compositions are not made by chance, nor can they ever in any medium be made at small expense.

—John Ruskin

## FINISH INFORMATION

---

**A**NY of our ornamental designs can be hand chased, English or French style, at an additional cost. Prices upon application.

Special Finishes: Earle Hardware prices are based upon any standard finish suitable to the article. Polychrome, Silver and Gold are special finishes and are charged for as follows: Silver or Polychrome or Antiquing, 25 per cent of the list price additional; Gold, 250 per cent of the list price additional.

All of our plated finishes, except when otherwise stated, bear a coating of lacquer. This coating of lacquer will be left off when so ordered.

Any Wrought Iron Hardware can be duplicated in Brass or Bronze, if desired, at a discount of 25 per cent off net price. Bronze is sometimes desired in preference to Iron on account of its non-rusting qualities, especially in locations close to sea level or close to the ocean or large bodies of water. We can duplicate Iron finishes on Brass or Bronze.

Finishes on Wrought Iron: On Wrought Iron many people prefer the natural forge finish, and, while all Earle Wrought Iron is given a coating of lacquer which leaves a slight gloss, this gloss soon dulls to the natural forge finish that is preferred.

Likewise, many people desire Wrought Iron Hardware to attain a natural rust finish and for this reason Earle Wrought Iron Hardware is not rust-proofed in manufacture. When rust-proofing is desired, it will be supplied at no extra cost. This rust-proofing does not detract from the natural iron finish in any way and has no effect upon any other type of finish that may be desired.

### DESCRIPTION OF FINISHES

#### KEY NUMBERS OF METALS

- 1—Brass
- 2—Bronze
- 3—Copper
- 4—Iron or Steel
- 5—Nickel
- 6—Silver
- 7—Gold

#### KEY LETTERS OF FINISHES

- A—Antique, Mottled, or Shaded.
- B—Black.
- C—Crystallized, on Cast Brass or Bronze only.
- D—Dull or Dead Luster.
- E—Light, or Natural Color.
- F—Dark, generally oxidized.
- G—Gold Finish Lacquered, on Brass Only.
- H—Raised surface or edges Polished, and center relieved.

I—Raised surface or edges Dull and Lighter and center relieved.

J—Aged.

K—Statuary color on Bronze only.

L—Even Shade.

M—Wheel or Ship Finish.

N—Unpolished, Natural texture of Metal.

O—Smoked.

P—Polished and Buffed, high color.

Q—Acid.

R—Rusty.

S—Sanded.

T—Galvanized.

U—Unlacquered.

V—Verde, Green.

W—Waxed.

X—Electro Plated.

Y—Enameled.

Z—Polychrome. State colors desired.

### Earle Hardware Mfg. Co. Symbols of Finishes

#### BRASS

- 1N—Unpolished natural texture of brass, bright dipped.
- 1P—Polished brass, high color.
- 1PU—Polished brass, high color, unlacquered.
- 1C—Crystallized brass, on cast metal only.
- 1D—Dull brass, lacquered.
- 1DU—Dull brass, unlacquered.
- 1X—Electro brass plated, bright, unpolished.
- 1O—Smoked brass.
- 1J—Aged brass.
- 1M—Brass, wheel or ship finish.
- 1A—Antique brass, oxidized, shaded.
- 1AH—Antique brass, oxidized, shaded, raised surface or edges polished, center relieved.
- 1AI—Antique brass, oxidized, shaded, raised surface or edges dull and lighter, center relieved.

1Y—Brass enameled.

#### SANDED BRASS

- 1S—Plain sanded brass, natural color.
- 1DS—Dull brass, sanded, light.
- 1IS—Sanded brass, slightly oxidized, light center, raised surface or edges dull and light.
- 1HS—Sanded brass, slightly oxidized, light center, raised surface or edges polished.
- 1AS—Antique brass, sanded, shaded.
- 1ALS—Antique brass, sanded, even shade.
- 1AIS—Antique brass, sanded, shaded, center relieved, raised surface or edges dull and light.
- 1AHS—Antique brass, sanded, shaded, center relieved, raised surface or edges polished.
- 1ANS—Antique brass, sanded, shaded, natural texture of metal.

## Symbols of Finishes—Continued

### BRONZE

- 2N—Unpolished, natural texture of bronze, bright dipped.
- 2M—Wheel or ship finished bronze.
- 2D—Dull bronze, lacquered.
- 2DU—Dull bronze, unlacquered.
- 2C—Crystallized bronze, on cast metal only.
- 2P—Bronze, polished and buffed high color.
- 2X—Electro bronze plated, bright unpolished.
- 2O—Smoked bronze.
- 2J—Aged bronze.
- 2W—Waxed bronze.
- 2K—Statuary bronze, slightly antique.
- 2KF—Statuary bronze, dark antique.
- 2KFH—Statuary bronze, dark antique, raised surface or edges polished, center relieved.
- 2KIF—Statuary bronze, dark antique, raised surface or edges dull and lighter, center relieved.
- 2JV—Aged bronze and verde background.

### SANDED BRONZE

- 2S—Unpolished natural bronze sanded.
- 2DS—Dull sanded bronze, light.
- 2KS—Statuary bronze, slightly antique, sanded.
- 2KFS—Statuary bronze, dark antique, sanded.
- 2KHS—Statuary bronze, antique, sanded, raised surface or edges polished, center relieved.
- 2KIS—Statuary bronze, antique, sanded, raised surface or edges dull and lighter, center relieved.

### COPPER

- 3P—Polished copper, high color.
- 3E—Natural copper, light.
- 3D—Dull copper.
- 3W—Waxed copper.
- 3O—Smoked copper.
- 3X—Electro copper plated, bright unpolished.
- 3J—Aged copper.
- 3JV—Aged copper and verde.
- 3A—Antique copper mottled, or shaded (Old Copper)
- 3AN—Antique copper, shaded, natural texture of metal.
- 3AH—Antique copper, shaded raised surface or edges polished, center relieved.
- 3AI—Antique copper, shaded raised surface or edges dull and lighter, center relieved.
- 3AL—Antique copper, even shade, gun metal finish.

### SANDED COPPER

- 3S—Sanded copper, natural color.
- 3AS—Antique copper, sanded, shaded.
- 3ALS—Antique copper, sanded, even shade.
- 3AHS—Antique copper, sanded, shaded, raised surface or edges polished, center relieved.
- 3AIS—Antique copper, sanded, shaded, raised surface or edges dull and lighter, center relieved.
- 3ANS—Antique copper, unpolished, shaded, sanded.

### IRON OR STEEL, PLAIN AND SANDED

- \*4N—Rustless or regular iron unpolished.
- \*4PS—Rustless or regular iron polished and sanded.
- 4XSB—Sanded iron, electro plated, dead black, imitation Barr Barff.
- 4XB—Iron electro plated, dead black, not sanded.
- 4BY—Iron, dead black enameled.
- 4T—Galvanized or sherardized iron.
- 4Z—Polychrome iron, state colors desired.
- 4DW—Polished iron or steel, dull finish, waxed (Armor Bright).

- 4R—Rusty iron or steel, natural.
- 4P—Polished iron or steel, high color.
- 4XR—Electro iron plated or enameled, rusty on any metal.
- 4O—Smoked iron, old English iron, old iron, high lights relieved.
- 4L—Boiled iron, even shade, not relieved.
- 4XO—Electro plated, or enameled on any metal to imitate smoked iron.
- 4XN—Electro plated black iron, natural texture of metal.

### PLAIN AND SANDED NICKEL PLATE

- 5P—Highly polished and buffed nickel, high color.
- 5N—Unpolished nickel plate, natural texture of metal, white nickel.
- 5D—Dull nickel plate.
- 5A—Antique nickel plate, shaded.
- 5AH—Antique nickel plate, shaded raised surface or edges polished, center relieved.
- 5B—Black nickel, steel plated, dark grey metallic cast.
- 5S—Sanded nickel, plain.
- 5AS—Antique sanded nickel, shaded.
- 5AHS—Antique sanded nickel, shaded, raised surface or edges polished, center relieved.
- 5AIS—Antique sanded nickel, shaded, raised surface or edges dull and lighter, center relieved.

### PLAIN AND SANDED SILVER PLATE

- 6P—Polished and buffed silver plate, high color. Hand chased articles burnished.
- 6D—Dull silver, all light.
- 6A—Antique silver, oxidized, shaded.
- 6U—Unlacquered silver, will oxidize and age naturally.
- 6O—Smoked silver, old English effect.
- 6AH—Antique silver, oxidized, shaded raised surface or edges polished, center relieved.
- 6AI—Antique silver oxidized, shaded, raised surface or edges dull and lighter, center relieved.
- 6S—Sanded silver, all light.
- 6AS—Sanded silver, oxidized, shaded.
- 6AHS—Antique silver oxidized, shaded, sanded, raised surface or edges polished, center relieved.
- 6AIS—Antique silver oxidized, shaded, sanded, raised surface or edges dull and lighter, center relieved.

### PLAIN AND SANDED GOLD PLATE

- 7P—Polished gold, high color, hand chased articles burnished.
- 7D—Dull gold, light.
- 7DA—Antique dull gold, shaded.
- 7DAH—Antique dull gold, shaded, high lights burnished.
- 7Y—Gold enameled.
- 7AY—Gold enameled, antiqued.
- 7S—Sanded gold, light.
- 7SA—Antique dull gold, shaded, sanded.
- 7SAH—Antique sanded gold, shaded, high lights burnished.
- G—Gold finish, lacquered on brass only.

### VERDE

- AV—Antique verde, glazed.
- AVI—Antique verde, glazed, raised surface or edges relieved.
- QV—Acid verde, on brass or bronze only.
- QVI—Acid verde, on brass or bronze only, raised surface or edges relieved.

\*Genuine Barr Barff—Not furnished by Earle Hardware Manufacturing Co.

Blind	74
Door	71-72, 74-75
French	71
Full and Half Surface Strap	45-48
Offset	74-75
Ornamental Wrought Iron	45-48, 72
Refrigerator	75
Ship	75
Special	74-75
Special Butterfly	75
Holdbacks, Blind	63-64

### HOLDERS—

Card	151
Door	134-136
Label	151
Label and Pull, Combination	151
Shutter	63-64
Hoods, Letter Slot	69
Hook Sash Lift	130
Hooks and Eyes	129

### HOOKS—

Cabin Door	129
Ceiling, Swivel	140
Coat and Hat	139-141
Harness	140
Razor Strop	140
Rope	140
Towel	140

## I

Information, Hands of Door	70
Information, Knob Spindle and Lock	76
Information, Strap and Hinge	42
Inside Escutcheons	100

## J

Jamb Bolts	111
------------	-----

## K

Key Escutcheons	97-99
Key Plates	97-99
Keyhole, Dummy	99
Kick Plates	53-54
Knob Extension Flush Bolt	112
Knob Flush Bolt	115
Knob Spindle, Lock Information	76
KNOBS—	
Base	134-136
Door	90-94
Drawer	91, 152-153

Knockers	28-35
Knockers, Guest Room	35
Knockers, Wrought Iron	28-30

## L

Label Holders	151
Label Holders and Pulls, Combination	151
Lag Screw Blind Holdbacks	64
Lag Screw Shutter Holders	64

### LATCHES—

Lift	108
Plate	80, 106-107
Plate, Wrought Iron	80, 106-107
Thumb	102-105
Thumb, Wrought Iron	102-104
Swing	143

Lavatory Hardware	142-143
Letter Slots and Hoods	69
Letters	67
Lever Escutcheons	77, 79-80
Lever Handle Auxiliary Springs	86
Lever Handles	77, 79-89
Lever Roses	80-89

992

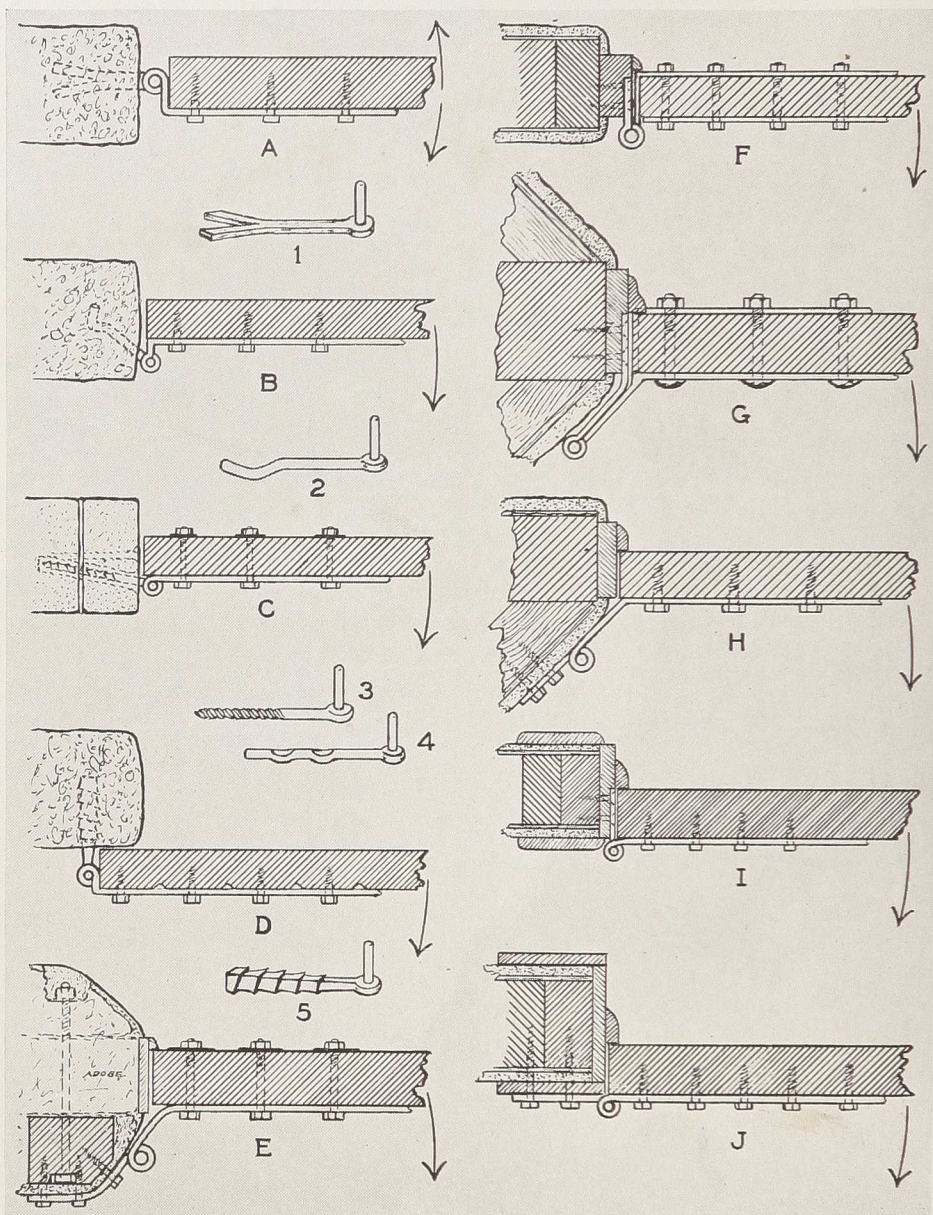

## Wrought Iron

Number	Design	Number	Design
989	Spanish	991	English
990	Spanish	992	Italian

Old Iron, Rusty Iron, Black and Polychrome are the most popular finishes for these Grilles. Finished to match other wrought iron hardware.

Other information on previous page.

The above illustrations show various methods of attaching straps to doors, gates, jambs and posts. This information, we believe, will be found invaluable when ordering straps, as without a detail it is sometimes impossible to understand what is required. Therefore, please consult this page when ordering full-hinged straps, using letter to designate type required.

When ordering false straps it is desirable that we know the size of butt hinge, that strap width can be made the same.

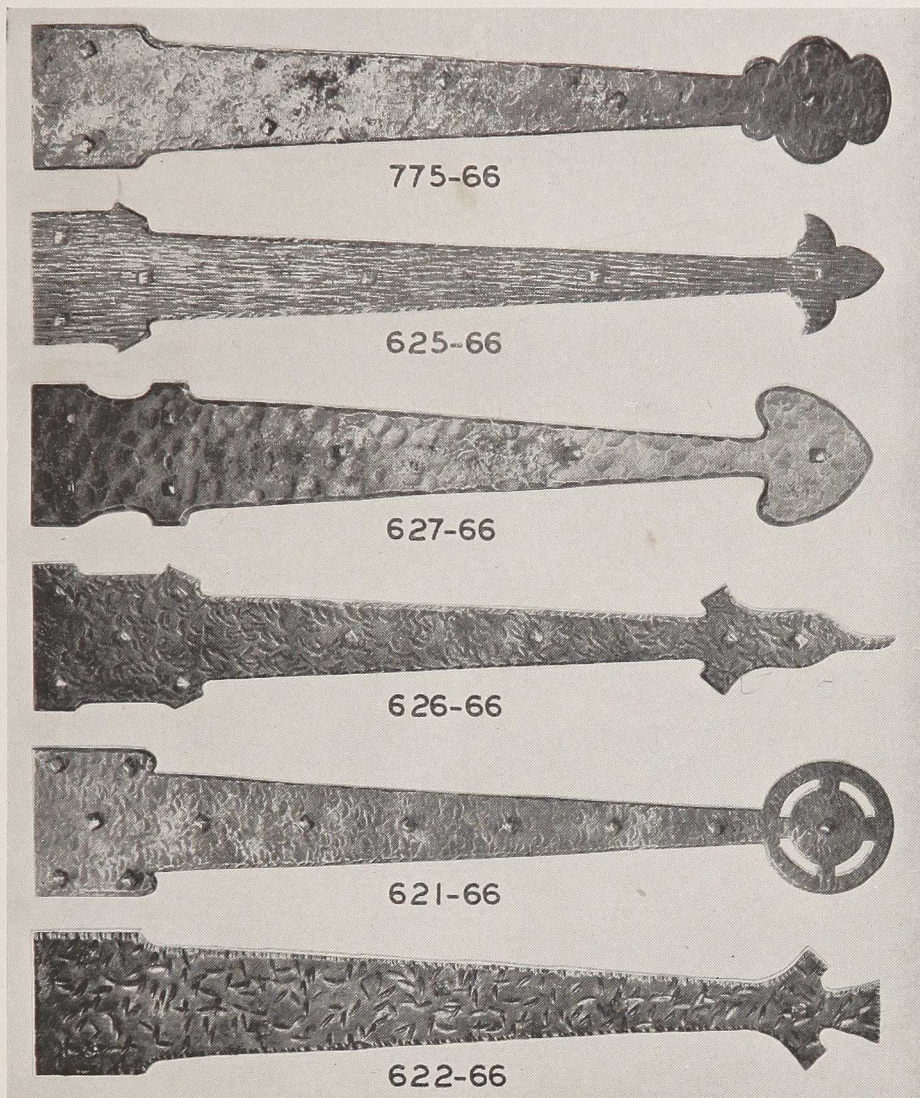

Some strap designs shown in this catalog match similar designs in handles, etc. We can design straps to match other handles, plates, etc., as well. Prices on application.

593	3 $\frac{1}{4}$	4 $\frac{1}{4}$	1 $\frac{1}{4}$ or 1 $\frac{1}{2}$	.....

Net Price per lineal inch on various size tubing, listed below:

Size	Price per Inch
$\frac{3}{8}$ Round	.....
$\frac{1}{2}$ "	.....
$\frac{5}{8}$ "	.....
$\frac{3}{4}$ "	.....
1 Round	.....
1 $\frac{1}{8}$ "	.....
1 $\frac{1}{4}$ "	.....
1 $\frac{1}{2}$ "	.....

Prices on Bars as number 198 other than size listed, can be figured on a basis of price of tube per inch plus price of End Bases Number 593 per pair.

Numbers listed at minimum length of 24" can be figured in longer lengths, at price per inch plus minimum price.

All lengths figured center to center of end bases, with the exception of Numbers 192, 195, and 507, which are figured end to end.

Number 507 will be found very satisfactory used as a clothes rod, shoe rack, and for other similar purposes.

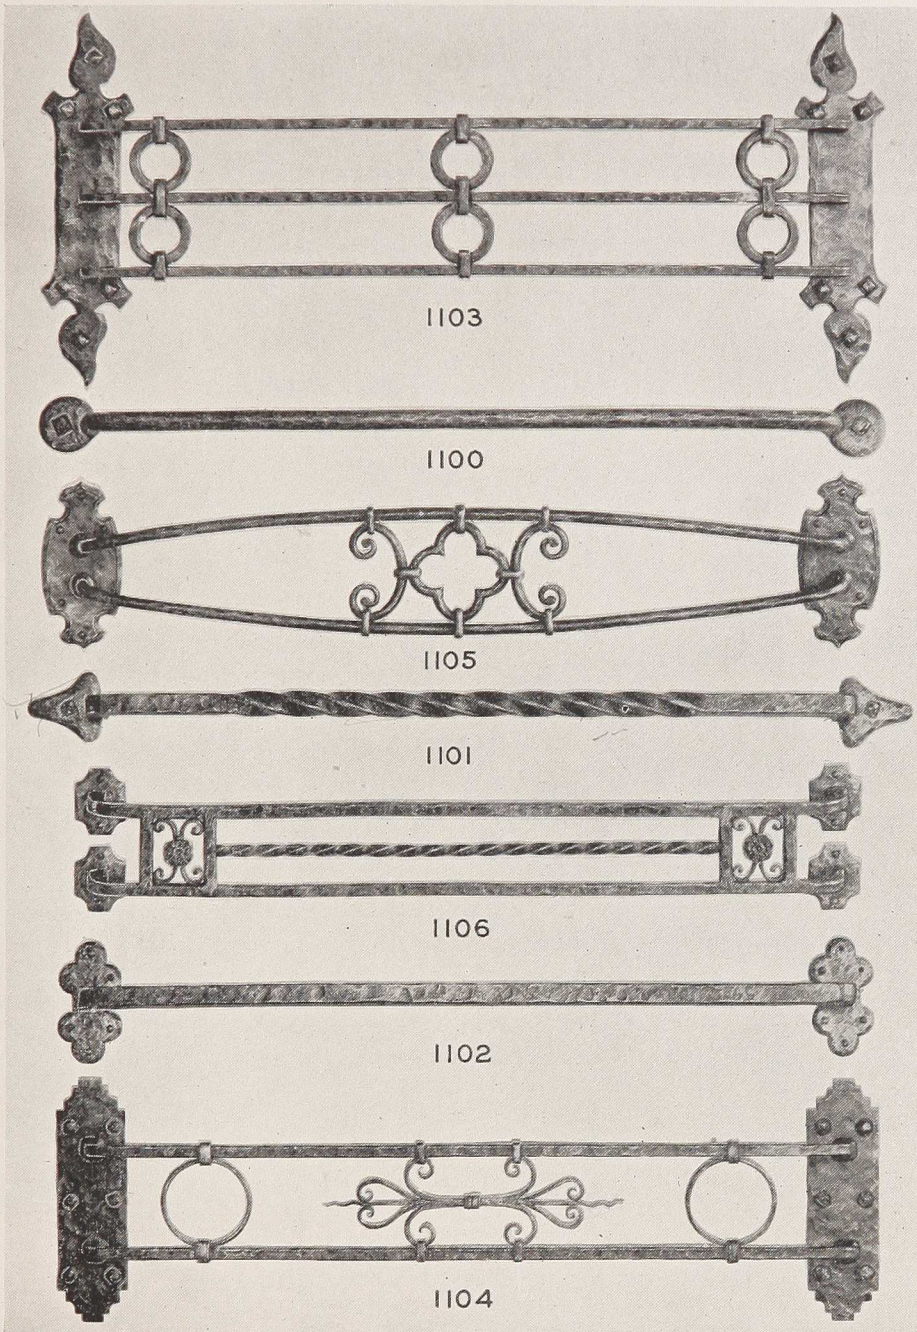

When ordering No. 593 ball ends specify whether wood screws from face or machine bolt from back is desired, otherwise screws from face will be sent, as shown in lower cut No. 593.

Wrought Iron

Number	Size	Price Each
1144	4	.....
1144	5	.....
1145	3 $\frac{3}{4}$ x12 $\frac{1}{4}$	.....
1146	2 $\frac{3}{4}$ x10 $\frac{1}{4}$	.....
1147	4	.....
1147	5	.....

Number 1145 also made with box and light socket in rear, frosted glass behind numbers allowing light to show through. This arrangement is very desirable on a building set some distance back from the street, as it is very difficult to discern the ordinary house number at night, even under the most favorable conditions. Price complete, but less lamp, three times cost of plate only.

Number 0585 is an inside plate for slot No. 585. Inside plates made for other numbers shown, at net cost of slot less 40 per cent.

SPECIFY FINISH DESIRED

As we do not manufacture mortise locks at present, no detail showing their application to doors is shown. We urgently request that this page be consulted before ordering rim locks, lever handles, casement fasteners, French hinges, and articles of like nature requiring handing, as we will not assume responsibility for errors unless we have not followed your instructions.

These details being plainly marked as to hand and opening, in or out, we believe additional instructions would only tend to confuse our customers. We have therefore made them as clear and simple as possible.

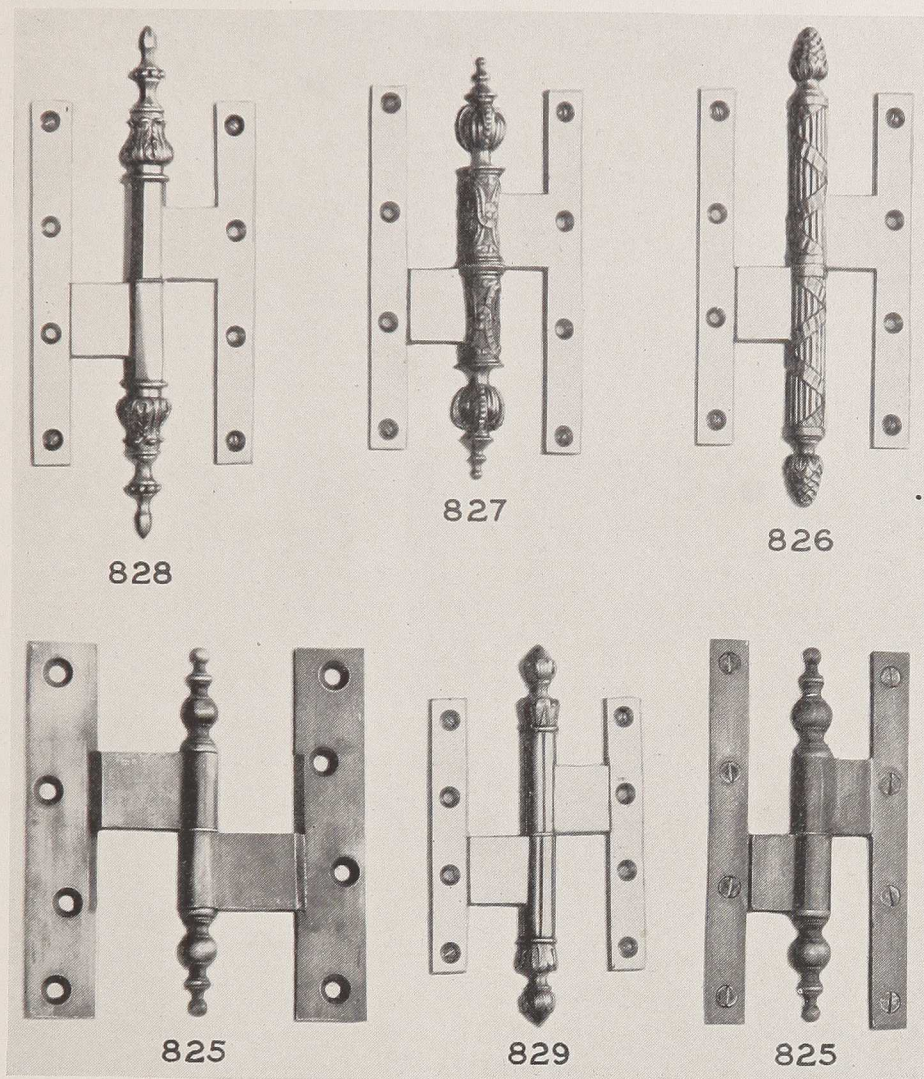

Your cooperation will be greatly appreciated, and we also believe this method of ordering will expedite shipment of goods ordered.

## LEGEND

BS—Backset.  
S—Spacing.  
FDL—Front Door Lock, outline detail.  
IL—Inside Lock, outline detail.  
W—Common Spindle Washer, iron or brass.  
CS—Common Spindle,  $\frac{5}{16}$ " or  $\frac{3}{8}$ ".  
TS—Threaded Spindle,  $\frac{5}{16}$ " or  $\frac{3}{8}$ ".

S—Square Hub.  
D—Diamond Hub.  
CK—Common Knob; applies to shank only.  
TK—Threaded Knob; applies to shank only.  
16—Plate to make knobs or levers stationary, Spindle plate—Wrought Steel.

All knobs and levers made by this firm are threaded for  $\frac{3}{8}$ "—20— $\frac{5}{16}$ " steel spindles, diamond, unless otherwise ordered.

Spindles not furnished unless ordered.

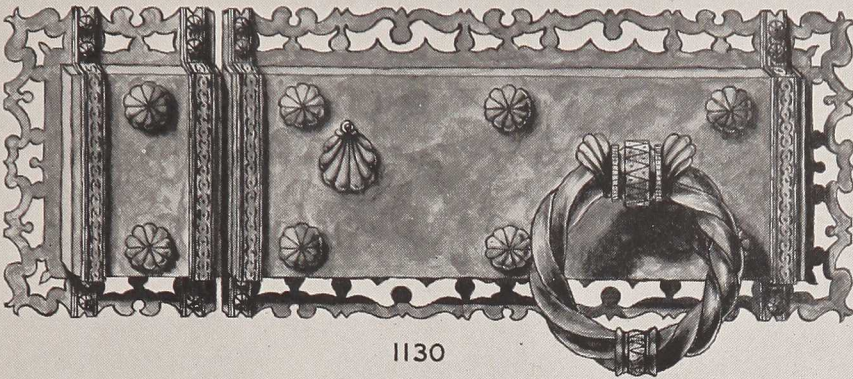

We furnish TK type knob shank with all threaded spindles.

When ordering knobs and levers requiring spindles, please specify size of spindle, type of lock, whether diamond or square hubbed, so spindles will fit and set screws be in the correct place in shank of knob or lever to hold same in the proper position.

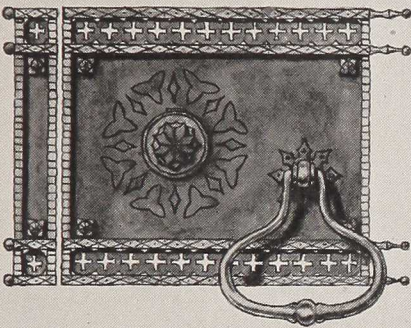

All medium and heavy levers furnished with two case-hardened pointed set screws.

When ordering full-length handles and inside escutcheons, please refer to the above details covering backset and spacing so that cylinder and keyholes will be spaced properly in relation to thumb pieces and knob hubs. This information will avoid considerable confusion.

### IMPORTANT INFORMATION REQUIRED

Levers shown on this and following pages are right hand.  
No information regarding hand is required on straight levers, but on scroll and odd shaped levers it is imperative to have this information.  
Sketches and information on pages 70 and 76 give this in detail.  
Auxiliary springs page number 86.  
Auxiliary springs and spindles not furnished unless ordered.  
Unless finish is specified old iron finish will be furnished.  
Number 767-55 only, made of stainless iron, will retain its high polish indefinitely.

962	2¼ Dia.	3	Spanish	.....	955	2¾x2¾	3	Italian	.....
958	2½ Dia.	3	English	.....					

All numbers shown on this page, with the exception of numbers 960, 954, 953, 955, designed to be made of wrought iron. However, these numbers can also be made in cast brass or bronze if desired at a cost of 25% discount off net cost.

These rings are suitable for a variety of uses, as pulls for shutters, door pulls and to take the place of door knobs and levers, for which purpose they are designed.

Important information regarding spindles will be found on page number 76. Please refer to this page when ordering rings for door locks.

## Wrought Iron

Number	Plate Size	Ring Size	Design	Price Each
1050	2 $\frac{5}{8}$ x3 $\frac{3}{4}$	3 $\frac{3}{8}$ x5 $\frac{1}{4}$	Spanish	8.-
1051	2 $\frac{5}{8}$ x3 $\frac{1}{4}$	3 $\frac{3}{8}$ x5 $\frac{5}{8}$	Spanish	12.-

"	2¾x12	1½	English	4.50	777-44	2 x 10	1	Spanish	4.50

These latches are very attractive for inside doors in residences, eliminating the use of locks. However, these latches can be furnished to use with light latch locks if desired. Latches to be used with locks do not require trim, but require two handles to operate from each side of door.

When ordering, state whether complete with trim or to be used with lock.

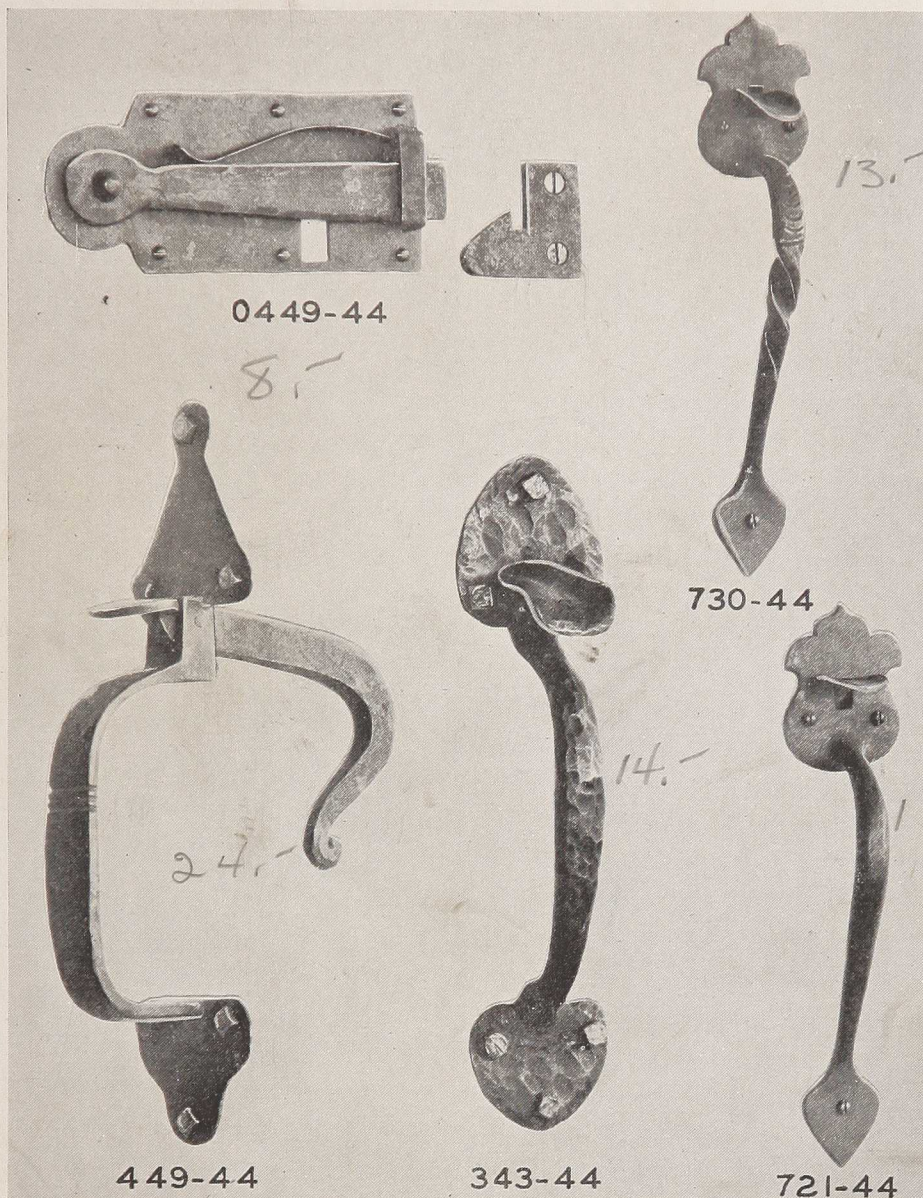

Give width of stile so that latch bar can be furnished proper length. Thumb latch stem figured for 1¾ to 2 inch door.

	1/4" Threaded Rod. Price per lineal ft. ....		
	Cap Nuts. Price per 100 .....		

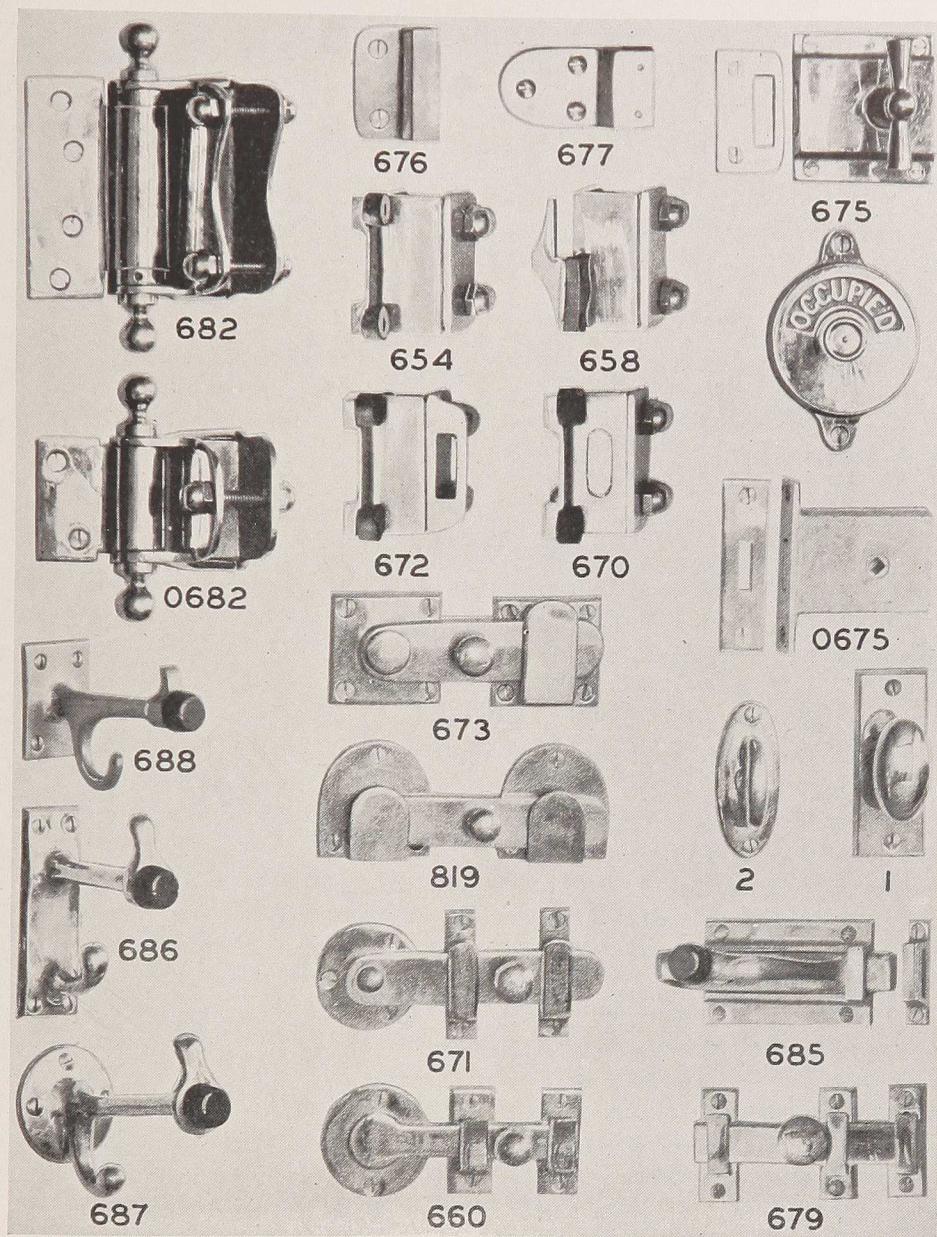

Specify thickness of Marble and hand of corners. In ordering Legs and Standards use combination of Letter and Number, for example B4 (see illustration) is a Tee Rail Fitting and Straight Way Fitting connected with tubing to make a Top Rail Standard. Standard height for Floor Standard is 12" (floor to bottom of marble). Standard height for Top Rail Standard 9" (top of marble to bottom of rail). All tubing and fittings are threaded, thereby allowing for some adjustment. Cap Nuts and Threaded Rod furnished with all fittings where required. Unless otherwise ordered all Lavatory Hardware will be furnished Nickel Plated.
